

Game Color Sets

Vallejo expands the Game Color series with **10 new color sets** in 4x18 ml blister packs designed by Ángel Giráldez.

The sets are designed following the **BSL** color system (Base, Shadow, Light) figure paint system, offering an easy choice of colors (shades) to paint miniatures with the appropriate highlights and shadows for each base color.

In addition to these three colors, a fourth shade has been added to “enhance” the results of blends made with the basic range.

BSL

Base: our base colors are very opaque, perfect for the application of a stable, resistant and long-lasting first layer; they are vivid, intense and easily mixable colors, which makes them very useful and essential on the workbench.

Shadow: shadows are dark colors, perfect for toning and achieving glazes, they can have a slight satin finish and more depth, but still capable of covering a surface with the application of a few brush strokes.

Light: highlights are the brightest colors in the range, ideal when used to lighten base colors and for glazing over white and pale tones. In addition, the multi-purpose nature of highlights makes them useful for easily outlining and blending layers of colors.

The sets, presented in a transparent **blister of 100% r-PET** (recycled/recyclable), include a **photographic step by step** and access, through QR code, to an **exclusive video tutorial** where Ángel Giráldez will guide you in the use of the colors.
