Diorama Project 1.3 Scenery and Dioramas 1

New book belonging to the Diorama Project series, initiated by Accion Press, and currently part of the Vallejo publications catalogue.

This series is aimed at modelers who specialize in military vehicles or figures, and who want to set their models in a diorama and, at the same time, learn essential modeling techniques.

This third volume addresses the construction and painting of bases for dioramas, including both natural and urban environments.

Through three detailed step-by-step articles, we delve into how to build and paint muddy terrain, riverbanks, and urban environments, as well as the proper techniques for integrating vehicles and figures with the terrain.

Authors: Shinpei Nohara, Frederik Astier, Fabrizio Pincelli, Rodrigo Hernández Cabos
Language: English (Spanish Ref. 75.047)
