

1/12 Ducati Superleggera V4

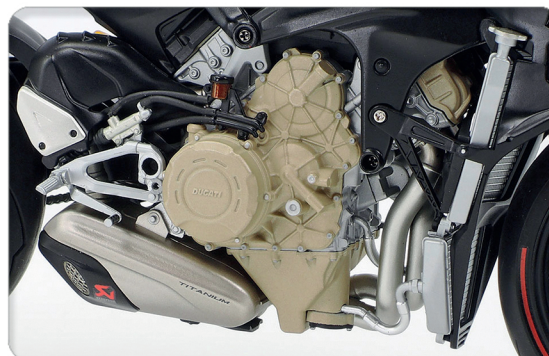

Item No: 14140

GET UP CLOSE TO THE 1/12 Ducati Superleggera V4

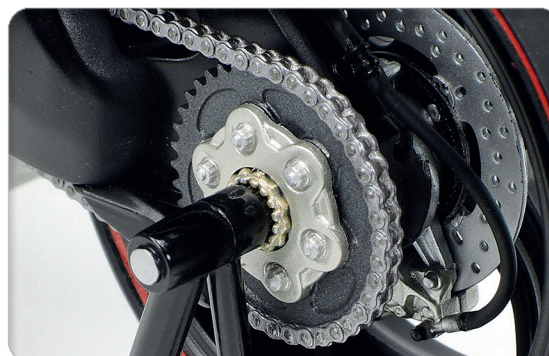

Cowls and undercover can be removed after completion of the model to admire the design beneath.

Depictions of the 998cc engine and the fuel tank are screw-attached to the model's frame.

Take a closer look at the finely drilled brake rotors and Brembo caliper.

This image goes close-up on the chain rollers, and the rear brake rotor.

Steering damper and engine-top airbox and battery are also captured.

The silencer shape blends expertly into the lines of the undercowl, for which a carbon fiber effect decal is included.

1/12 Ducati Superleggera V4

Tamiya Item # 14140 - Wittmax Item # 545292

Top Performer

Announced in February 2020, Ducati's Superleggera V4 utilizes the Panigale V4 as a base and features a strong focus upon lightness: cowlings, frame, swing arm and wheels are carbon fiber components, while power is supplied by a 998cc V4 engine that - in conjunction with an Akrapovic circuit exhaust - gives an impressive 234hp output. Highly distinctive "biplane wings" on the front cowl give the Superleggera V4 a strong visual identity and contribute to an impressive 50kg of downforce at 270km/h.

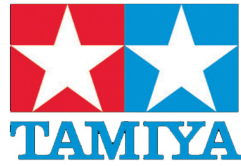

Only 500 of the full size Superleggera V4 were available for purchase, making this crystallization of Ducati's engineering and aerodynamic expertise an elusive catch indeed.

About the Model

- This is a 1/12 scale plastic model assembly kit. Length: 176mm, width: 67mm, height: 98mm.
- V4 engine, swing arm, front fork, side cowls and fuel tank are screw-attached to the bike frame.
- Accurately captures defining features of the motorcycle, such as four front cowl winglets, seat cowl inlets, undercowl shape, silencer and more.
- The chain is split into left and right halves, and features excellent detail.
- Side mirror surfaces are recreated using metal transfers.
- Decals are included to depict gradated red side cowl sections.
- Solid synthetic rubber tires have authentic tread patterns and Pirelli logo decals are included.

1/12 Ducati Superleggera V4

Tamiya is proud to announce the release of the Superleggera V4 as a new addition to our 1/12 Motorcycle Series.

The Superleggera V4 is a road-legal version of the Panigale V4 produced by the legendary Italian motorcycle manufacturer, Ducati. This motorcycle's cornerstone is the lightening facilitated by carbon fiber material in the fairings, chassis and swing arm, and its eye-catching design features the distinctive carbon fiber biplane wings on either side of the front cowl for aerodynamics.

The engine is the Desmosedici Stradale R, a 998cc V4 powerplant with Ducati's Desmodromic valve timing system. This motorcycle also uses Öhlins suspension and Brembo brake system. In addition, installation of the Akrapovic titanium muffler – which is for the racing kit – with a dedicated engine part results in a superb power/weight ratio of 1.54hp/ kg.
