Item No: 58717

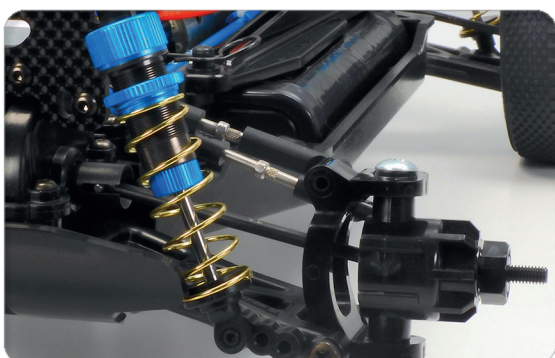

## GET UP CLOSE TO THE TT-02BR Chassis Kit

Turnbuckle steering and suspension arms can be adjusted quickly to fine-tune your setup.

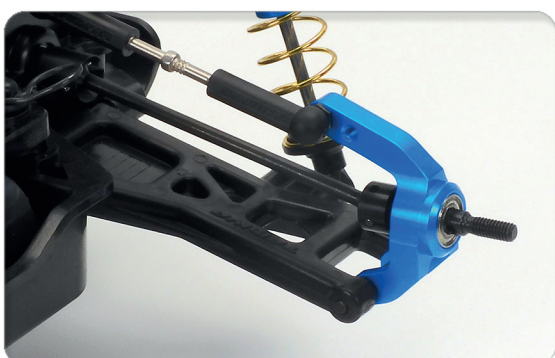

Assembly universal shafts help maintain speed when steering, for smoother cornering.

High spec oil dampers have precision aluminum cylinders with a low-friction interior coating.

The kit features an aluminum propeller shaft with plastic inserts in the propeller joints to minimize wear.

Aluminum rear uprights offer great rigidity to the benefit of your car's cornering. Switch left and right to alter toe.

Oil filled gear differentials let you fine-tune performance with oil viscosity. This kit has dedicated differential joints.

## Race-Oriented Buggy Chassis

This chassis assembly kit is an upgraded version of the 4WD off-road TT-02B chassis kit with a wealth of extra parts.

The drivetrain uses XV-02 oil gear differential units to adjust the effectiveness of gear differential, propeller joints with internal plastic parts to limit wear, front and rear universal drive shafts, and full ball bearings. Its suspension features new 3mm thickness carbon fiber damper stays to give more setup options, while the angle of rear wing high downforce is adjustable.

\*Includes Neo Scorchers body and wing (unpainted), and Item 54211 wing.

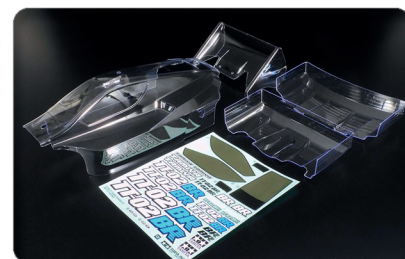

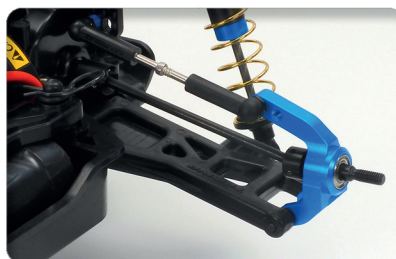

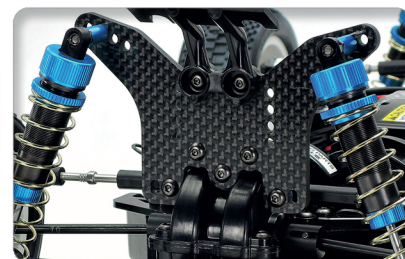

\*Motor, tires, R/C equipment and battery pack are sold separately.
