FIRST-AID MEASURES

IF IN EYES	:Gently rinse the affected eyes, including under the eyelids, with
	clean water for at least 15 minutes. Remove contact lenses if easily possible.
	Remove all chemicals from contact with victims eyes as quickly as possible.
	A delay of only seconds increase the injury. And refer for medical attention.
IF ON SKIN	Remove all contaminated clothing, shoes and socks from the
	affected areas as quickly as possible, cutting them off if necessary. Wash the affected areas
	under tepid running water using a mild soap. If irritation persists, arrange for transport to the
	nearest medical facility for examination and treatment by a physician as soon as possible.
IF INHALED	Remove the victim from the contamination immediately to fresh air.
	If breathing is weak, irregular or has stopped, open his airway, loosen his collar
	and belt and administer artificial respiration. And refer for medical attention.
IF SWALLOWED	:Do not induce vomiting.
	Never give anything by mouth to someone who is unconscious or convulsing. If the victim is
	responsive, give him one or two glasses of milk or water. And refer for medical attention.

FIRE-FIGHTING MEASURES

•EXTINGUISHING MEDIA:

Dry chemical powder, foam, dry sand or carbon dioxide.

Water may be ineffective in extinguishing a fire involving this material.

•SPECIFIC HAZARDS WITH REGARD TO FIRE-FIGHTING MEASURES:

Toxic gases (carbon monoxide) will form upon combustion.

ACCIDENTAL RELEASE MEASURES

Evacuate non essential personnel.

Shut off all sources of ignition : No flare, smoking or flames in area. Absorb spill with inert material(e.g., dry sand or earth), then place in a chemical waste container with covers for disposal, using non sparking tools. Remove leaking containers to a safe place, if feasible. Notify police and fire brigade.

HANDLING AND STORAGE

HANDLING

: Use only in the well-ventilated areas.

Make available in the work area emergency shower and eyes wash.

Keep container tightly closed.

Avoid contact with skin or eyes.

Shut off all gas pilot and electrical(spark or hot wire)igniters and other sources of ignition during

use and until all vapors (odors) are gone.

Use reduced-sparking hand tools.

Prevent build-up of electrostatic charges(e.g. by grounding).

Practice good personal hygiene after using this materials, especially before eating, drinking smoking or using the toilet.

STORAGE

: It should be kept in a tightly closed container, protected from physical damage,

and away form oxidizing materials and sources of ignition.

Store in a cool, dry, well-ventilated location.

Keep away form heat, steam pipe or sunlight.

EXPOSURE CONTROL / PERSONAL PRO ENGINEERING MEASURES PERSONAL PROTECTIVE EQUIPMENT	DTECTION : Use exhaust ventilation to keep airborne concentration below exposure limit.
EYE PROTECTION	: Face shields
HAND, SKIN AND BODY PROTECTION	 Impervious clothing. Chemical-resistant gloves, apron and impervious boots.
RESPIRATORY PROTECTION	: Industrial canister gas masks.
